Orwak 3210-Combi is a dual-function model, which can also be used as a baler.

Based on Orwak's standard baler, model 3210, this machine can bale packaging material and when using the insert it becomes an effective drum crusher. It compacts drums 5:1 in 22 seconds. Any liquid residue is collected in the insert.

3210-Combi is compact with small external dimensions and it takes up less than 1 m² floor space.

Please note: Orwak 3210-Combi is only constructed for drums made of sheet metal with a thickness of up to 0,7 mm!
